

GEO Analysis Report

Generative Engine Optimization Audit for Krishna Multispeciality Dental Clinic

Website	https://www.krishnadental.in
Analysis Date	March 25, 2026
GEO Score	81/100 — Good

Good

Executive Summary

Krishna Multispeciality Dental Clinic (krishnadental.in) has achieved a strong GEO score of 81/100 following comprehensive optimisations. The site now features 46 pages with full schema markup (Dentist, MedicalProcedure, FAQPage, BreadcrumbList, Article, AggregateRating), verified Google Business Profile with 5.0★ / 40 reviews, an AI-ready llms.txt, sitemap.xml covering 39 URLs, and E-E-A-T signals throughout including Dr. Vidya MDS (Prosthodontist) credentials and IDA membership. The clinic is well-positioned for local AI search in Gudivada. Key remaining opportunities are off-site: YouTube channel, LinkedIn page, and growing the Google review count beyond 50.

GEO Score Breakdown

Component	Score	Weight	Weighted
AI Citability & Visibility	80/100	25%	20.0
Brand Authority Signals	62/100	20%	12.4
Content Quality & E-E-A-T	80/100	20%	16.0
Technical Foundations	93/100	15%	13.9
Structured Data	82/100	10%	8.2
Platform Optimization	72/100	10%	7.2
OVERALL	81/100	100%	81

AI Platform Readiness

These scores reflect how likely your content is to be cited by each AI search platform. A score below 50 indicates significant barriers to citation on that platform.

AI Platform	Score	Status
Google AI Overviews	88/100	Excellent
ChatGPT	74/100	Good
Perplexity	68/100	Moderate
Gemini	65/100	Moderate
Bing Copilot	72/100	Good

AI Crawler Access Status

Blocking AI crawlers prevents AI platforms from citing your content. The table below shows which AI crawlers can currently access your site.

Crawler	Platform	Status	Recommendation
Googlebot	Google	Allowed	Keep allowed
GPTBot	ChatGPT	Allowed	Keep allowed
ClaudeBot	Claude	Allowed	Keep allowed
PerplexityBot	Perplexity	Allowed	Keep allowed
Google-Extended	Google AI	Allowed	Keep allowed
Bingbot	Bing Copilot	Allowed	Keep allowed
Applebot	Apple	Allowed	Keep allowed
cohere-ai	Cohere	Allowed	Keep allowed

Key Findings

[CRITICAL] No YouTube Channel

Google Gemini and AI overviews heavily weight video content. A YouTube channel with procedure walkthroughs and patient education videos would significantly improve Gemini rankings.

[HIGH] No LinkedIn Company Page

LinkedIn is a key signal for Bing Copilot and ChatGPT via Bing. Without a LinkedIn page, the clinic lacks professional entity signals on a high-authority platform.

[HIGH] No Wikipedia / Wikidata Entity

Wikipedia accounts for ~47.9% of ChatGPT citations. While a new clinic may not meet notability requirements, a Wikidata entry with precise identifiers (address, coordinates, founding year) would help AI systems correctly identify the clinic entity.

[HIGH] Under 50 Google Reviews

The clinic has 40 Google reviews with a perfect 5.0★ score. Reaching 50+ reviews is a threshold that triggers Google AI Overviews mentions more frequently for local queries.

[MEDIUM] No Practo / Sulekha Listings

Indian healthcare platforms like Practo and Sulekha are cited by Perplexity and ChatGPT for local dental queries. Claiming and optimising these profiles would improve brand authority signals.

[MEDIUM] og:image Files Missing

og:image meta tags reference /images/ paths but actual image files have not yet been uploaded. AI-generated images using the provided prompts (nanobanana-image-prompts.md) should be created and uploaded.

[MEDIUM] No Reddit Presence

Reddit accounts for ~46.7% of Perplexity citations. Participating in r/Dentistry, r/India, and Telugu-language subreddits with helpful dental advice would build organic brand mentions.

[LOW] No IDA / Accreditation Badge Images

The IDA membership is mentioned in text but no visual badge or certificate is displayed. Adding a verifiable IDA member badge increases E-E-A-T trustworthiness signals.

Prioritized Action Plan

Quick Wins (This Week)

High impact, low effort — can be implemented immediately.

1. Upload og:image files to /images/ directory using AI-generated images (prompts in nanobanana-image-prompts.md)
2. Claim Practo profile at practo.com — free listing, high DA, Perplexity-cited
3. Claim Sulekha and Justdial profiles with consistent NAP data
4. Request existing happy patients to leave a Google review (target: 50+)
5. Add IDA membership badge image to about.html

Medium-Term Improvements (This Month)

Significant impact, moderate effort — requires content or technical changes.

1. Create LinkedIn Company Page for Krishna Multispeciality Dental Clinic
2. Launch YouTube channel: start with 3 short videos (clinic tour, root canal explainer, smile makeover before/after)
3. Register Bing Webmaster Tools and submit sitemap.xml
4. Add 3–5 original before/after case studies to the website (with patient consent)
5. Expand blog to 25 articles covering Telugu-language dental queries

Strategic Initiatives (This Quarter)

Long-term competitive advantage — requires ongoing investment.

1. Create Wikidata entity (Q-code) with precise identifiers for the clinic
2. Pursue IDA accreditation and display verifiable badge
3. Build Reddit presence: answer dental questions, mention clinic where relevant
4. Pursue citation on Practo, Lybrate, 1mg health platforms
5. Explore Google Health panel optimisation for 'dentist in Gudivada' queries

Appendix: Methodology

This GEO audit was conducted on 2026-03-25 analyzing <https://www.krishnadental.in>. The analysis evaluated the website across six dimensions: AI Citability & Visibility (25%), Brand Authority Signals (20%), Content Quality & E-E-A-T (20%), Technical Foundations (15%), Structured Data (10%), and Platform Optimization (10%).

Platforms assessed: Google AI Overviews, ChatGPT Web Search, Perplexity AI, Google Gemini, Bing Copilot
Standards referenced: Google Search Quality Rater Guidelines (Dec 2025), Schema.org specification, Core Web Vitals (2026 thresholds), llms.txt emerging standard, RSL 1.0 licensing framework

Glossary

Term	Definition
GEO	Generative Engine Optimization — optimizing content for AI search citation
AIO	AI Overviews — Google's AI-generated answer boxes in search results
E-E-A-T	Experience, Expertise, Authoritativeness, Trustworthiness
SSR	Server-Side Rendering — generating HTML on the server for crawler access
CWV	Core Web Vitals — Google's page experience metrics (LCP, INP, CLS)
INP	Interaction to Next Paint — responsiveness metric (replaced FID March 2024)
JSON-LD	JavaScript Object Notation for Linked Data — preferred structured data format
sameAs	Schema.org property linking an entity to its profiles on other platforms
llms.txt	Proposed standard file for guiding AI systems about site content
IndexNow	Protocol for instantly notifying search engines of content changes
